

A close-up photograph of a swimming pool's edge. The pool is lined with small, square, blue mosaic tiles that have a textured, slightly irregular surface. A concrete coping runs along the top edge of the pool. The water is clear and blue, reflecting the sky and the tiles. The overall scene is bright and clean, showcasing the tiles in a real-world application.

ISLAND STONE *&* TILE

Cool down with hot lava inspired pool tile

Durable fused glass tiles feature an iridescent, undulating surface that plays with light in the water.

A paradoxically cool glass tile line, Island Stone's Lava Glass mosaics incorporate iridescent and undulating surfaces that play with light in water. The shimmering, wetscapes look is sensual and inviting, ideal for pools, showers, and other water and water-adjacent applications. The fused glass tile features durable back paint applied at over 1,025 degrees Fahrenheit, giving the tiles a brilliant, pearlescent color spanning the light and dark tones of each across a single mosaic.

1"x 1" Straight Set & V-Cap Strip - Windward Bay - Mixed

PATTERNS:

1"x 1" Straight Set

PRODUCT DETAILS

- Lava Glass is a fused glass tile with a durable coating on the back of the tile. The coating consists of two layers, the color layer, and a protective white top layer, which are both fused to the back of the tile at a temperature in excess of 1025°F.
- Lava Glass mosaics and V-Cap Strips are back mounted with an alkali resistant mesh and non-water-soluble glue facilitating successful installation in submerged applications.
- Lava Glass meets or exceeds all industry requirements for use in exterior freeze-thaw environments and submerged applications found in "ANSI A137.2 American National Standard Specifications for Glass Tile."
- Lava Glass can be readily cut on a wet saw with a continuous rim diamond blade designed for cutting glass tile. Do not dry cut glass tile with a power tool.
- Lava Glass does not need to be sealed.
- Lava Glass should be cleaned with a pH neutral tile cleaner or alkaline based cleaner.

Lava Glass has a unique molten texture, creating the illusion of a shimmering surface as it plays with light in water. Lava stands out as an exceptional pool tile. It's the little details that make all the difference in wetscape applications."

~ Jeff Nibler, CEO Island Stone North America

Developed by glass tile experts, Lava Glass is highly durable, meeting or exceeding all industry requirements for use in exterior freeze-thaw environments and submerged applications found in ANSI A137.2.

ORDER SAMPLES

ISLAND STONE & TILE

ABOUT ISLAND STONE

Your supplier-direct tile partner since 1997. California-based and globally sourced, shipping over 3,000 tons of ceramic, glass, porcelain, and stone to showrooms worldwide each year. We invented mesh-mounted pebble tiles, pioneered dimensional stone, and refined glass tile color and texture—and we're still innovating. Need specs or design direction? Our in-house team brings 25+ years of expertise to interior and architectural projects.
